Merlo Multifarmer-Agriculture's Cross-Over Vehicle

Merlo's Multifarmer models combine the benefits of a heavy duty telehandler with excellence in conventional tractor applications. There are two models available:

MF34.7

Unladed weight: 17,600 lbs.
Max Load Cap: 7,500 lbs.
Lift Height: 22'4"
Max Height Load Cap; 7,400 lbs.
Reach: 12'6"
Max Load at Max Reach: 2,800 lbs.
Deutz 4/136HP
17'10" x 7'4" x 8'2"

MF40.9

Unladed weight: 20,100 lbs.
Max Load Cap.: 8,800 lbs.
Lift Height: 28'9"
Max Height Load Cap; 6,500 lbs.
Reach: 19'0"
Max Load at Max Reach: 1,750 lbs.
Iveco 4/170HP
18' x 7'9" x 8'3"

Standard features include frame leveling, CDC Dynamic Load Control system (reporting in real-time), hydraulic load sensing pump, multi-functional armrest with an electromechanical joystick, hydrostatic transmission, 3-point linkage, and electronic PTO. The towing hook, with hydraulic distributors, is designed to accept any implement used by conventional tractors, having the same power, for soil preparation and haulage operations.

Merlo perfected its modular cab design by building upon its already best-in-class features. It offers the largest cab within its class, a wide, easy-access split doorway, and a hydro-pneumatic suspension package. Plus, the "automotive feel" dashboard offers better

ergonomic access to the machine controls. There is an eight vent AC/heat system. For better airflow and quality, the real estate on the door side of the cab holds anti-pollen filters. The new cab design extends the optimal 360-degree operator visibility with the "Merlo Sky-View" curved windshield for maximum visibility. Multifarmers are equipped with a "Fan Drive" system that changes fan rotation to clear air clogging debris.

Forks are standard. Multifarmers accept many attachments, such as clamps, grippers, hooks, and a number of bucket configurations. The no-flex boom ups its capabilities to include ground engaging activities. For more versatility, adding a skid steer attachment allows Multifarmers to easily operate many other attachments. Along with all the standard features, options are available that can make the Merlo Multifarmer even more compatible with your specific application.

Merlo telehandlers are available in the USA through Applied Machinery Sales, official importer and distributor, and its dealers. Visit ams-merlo.com to find your dealer, obtain datasheets and see the full range of Merlo telehandlers. AMS has new and used Merlo telehandlers for sale. It also offers rental, service, training, financing, and dealership opportunities.
